EDUCATION

National University of Singapore

August 2021 to May 2025

Bachelor of Computer Engineering, Distinction

TECHNICAL PROFICIENCIES

- 1) Frontend: ReactJS, Material UI (MUI), Flutter, Tailwind CSS
- 2) Backend: Django, NodeJS + Express, .NET
- 3) Database: MongoDB, MySQL, PostgreSQL, Redis
- 4) Testing: Junit, Selenium, Mocha, Chai, Jest, Postman
- 5) DevOps: Azure DevOps, YAML, GitActions, Docker
- 6) Authentication: Auth0, AWS Incognito
- 7) Cloud Infrastructure: Azure Kubernetes, AWS Services (EC2, CloudWatch, Lambda, SES, Secrets, etc)
- 8) Others: Unity Engine, Celery, Postman

WORK EXPERIENCE

A*STAR Diagnostics Development Hub

Software Developer Intern

January 2024 - July 2024

- Optimized memory efficiency by deploying a microservice that reduced memory consumption by 83%.
- Independently spearheaded development on a serverless AWS stack that kickstarted development for a project.
- Refactored and decoupled a backend's router and service components, enhancing maintainability and scalability.
- Designed and authored an end-to-end integration test suite that ensured a 90% test coverage.
- Designed and implemented test and report pipelines in Azure DevOps, streamlining the CI/CD process.

MVP Studios

Full Stack Software Engineering Intern

May 2023 - August 2023

- Developed a mobile platform, concurrently monitoring the status of a farm's plants via their cameras and notified farmers if any issue arises, improving their response rates to adverse issues by cutting them down by 40%.
- Implemented 5 features, all of which streamlined monitoring and harvesting processes.

Oddle

Ecommerce Intern

January 2021 – May 2021

- Worked with the Tech Team by assisting in bug fixes and spearheaded designing and creating websites for merchants.

TECHNICAL PROJECTS

First Hire (Job Application Web Scraper)

March 2024 – Current

- Developed a web application that periodically scrapes the internet for job opportunities, streamlining the process of finding relevant jobs for users, notifying them of jobs via email as soon as they are released.
- Monitoring over 100 companies, allowing users to seamlessly track a huge pool of job opportunities.
- Empowered users with advanced filtering capabilities to precisely tailor job searches, surpassing the limitations of traditional job boards.

Project Dev: AquaC15

August 2022 – December 2022

- Spearheaded a Game Development Team in developing a 2D Open World Platformer.
- Leveraged the Unity Framework and planned out sprints for developers, artists, and level designers.

Kakilang! The Social Web Application

May 2022 – August 2022

- Developed and deployed a social web application that aimed to promote social communities.

CO-CURRICULAR ACTIVITIES

- Managed a committee that planned events and welfare for a community with over 200 members within the University Scholars Programme.
- Facilitated the transition from USP to NUS College, bridging the gap between Yale NUS and USP Students by being a representative of the Community.
