Portfolio: tinyurl.com/dylanhoshujie, github.com/ChubbsBunns

Engineer with experience building and scaling systems in regulated financial environments. Currently at DBS, liaising with vendors like MongoDB and Redis to maintain compliance-critical systems.

EDUCATION

National University of Singapore (NUS)

Graduated May 2025

Bachelor of Computer Engineering Honours, Distinction, Second Upper

WORK EXPERIENCE

DBS Singapore

Database Administrator, Automation Engineer, Management Associate

July 2025 - Current

- Served as technical point-of-contact for 100+ internal applications, bridging between engineering teams and business stakeholders in a regulated banking environment
- Liaised directly with MongoDB vendor representatives to troubleshoot and resolve production issues, gaining firsthand experience navigating enterprise vendor relationships and supporting escalation processes.
- Led a 1TB+ production data migration with minimal client downtime through careful planning and staged rollouts.
- Developed internal automation tooling to streamline DBA workflows, reducing manual overhead and improving reliability across the application portfolio.

A*STAR Diagnostics Development Hub

Software Developer Intern

January 2024 - July 2024

- Optimized memory efficiency by deploying a microservice that reduced memory consumption by 83%, preventing crashes and leading to more stable releases and keeping the website online reliably.
- Collaborated with Medical Professionals to develop and deploy medical software products like CareCam, allowing quicker diagnosis for leg-related injuries.
- Spearheaded development on a serverless AWS stack that sped up the completion for all future serverless projects.
- Optimised backend APIs, increasing scalability and authored a test suite achieving 90% coverage.

MVP Studios

Full Stack Software Engineering Intern

May 2023 - August 2023

- Collaborated with ComCrop, a vertical farming company to developed a mobile platform. Monitored and notified the clients the status of a farm's plants via their cameras, improving their response rates to adverse issues by cutting them down by 40%.
- Collaborated with developers and Stake Holders using Agile methodologies to develop the application efficiently.

TECHNICAL SKILLS

Backend: Node.js, Django, .NET, Express, Celery

Frontend: React, Next.js, Tailwind, Flutter

Databases: MongoDB, MySQL, Redis

Cloud & DevOps: AWS, Azure, Docker, GitHub Actions, Azure DevOps

Languages: TypeScript, JavaScript, Python, Java, C#, SQL

TECHNICAL PROJECTS

First Hire (Job Application Automation Tool)

March 2024 – Current

- Built an automated job discovery and notification system that monitors company career pages and emails clients.
- Designed backend scheduling and alert pipelines to trigger relevant email notifications in near-real time

LEADERSHIP & COMMUNITY

- Managed a committee organising events for a 200+ member community at NUS College/USP
- Facilitated community-building events at Friendzone, bringing together people across diverse backgrounds, relevant experience in engaging varied audiences.
